Using Measures: Make comparisons between objects relating to size, length, weight and capacity. Compare length, weight and capacity.	Compare, describe and solve practical problems for: <ul style="list-style-type: none"> ➤ Lengths and Heights ➤ Mass/Weight ➤ Capacity and Volume ➤ Time Measure and begin to record the following: <ul style="list-style-type: none"> ➤ Lengths and Heights ➤ Mass/Weight ➤ Capacity and Volume ➤ Time 	Choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels. Compare and order lengths, mass, volume/capacity and record the results using >, < and =.	Measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml).	Convert between different units of measure. Estimate, compare and calculate different measures.	Convert between units of metric measure. Understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints. Use all four operations to solve problems involving measure using decimal notation, including scaling.	Solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate. Use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places. Convert between miles and kilometres.	Spring 3 Spring 4 Summer 6	Spring 5 Summer 4	Spring 4 Summer 4	Autumn 3 Spring 2 Summer 3	Summer 1 Summer 4 Summer 5	Spring 4
