

SCIENCE CURRICULUM COVERAGE

Updated July 2023

SCIENCE INTENT

Here at Wheatlands Primary School, in line with the National curriculum, science is taught with the intent of giving children a secure knowledge and conceptual understanding of the world. We understand that in order to develop an understanding of the nature, processes and methods of science, it is important for children to **experience**, and be explicitly taught, different enquiry types that encourage them to **ask and answer scientific questions** about the world around them. We encourage our children to be inquisitive and we want them to be equipped with the knowledge base and **scientific skills** required to understand the uses and implications of science, today and for the future which includes all elements of STEM (Science, Technology, Engineering and Maths) where applicable.

At Wheatlands, a strong emphasis is placed on developing independent and thoughtful learners who are resilient. Throughout the programme of study, the children will acquire and develop the **key knowledge** and **vocabulary** identified within each year group, as well as the application of specific scientific skills.

Through each unit or block of work, we aim to allow children time to **explore**, make links with prior learning, practise and apply their knowledge and skills in different situations, as well as reviewing their learning and challenging any misconceptions they might hold so that learning is not superficial. For those more able learners, we ensure additional challenges are given to allow children to further apply their knowledge and understanding and explain 'why'.

Science permeates every aspect of daily life and wherever possible, children will learn about current science affairs and links will be made to their own science learning.

At each stage, teaching and learning strategies promote **discussion**, collaborative working and **thinking skills** so that children are supported in developing the confidence and resilience they need to succeed.

Science: EYFS

Understanding the World- The Natural World

Birth to three years	Three to four years old	Reception (five year old)	Statutory Early Learning Goals
<ul style="list-style-type: none"> Repeat actions that have an effect. Explore materials with different properties. Closely observes what animals, people and vehicles do. Explore natural materials, indoors and outside Explores and responds to different natural phenomena in their setting and on trips. Developing a curiosity, appreciation and respect for living things. 	<ul style="list-style-type: none"> Use all their senses in hands on exploration of natural materials. Talks about what they see using basic vocabulary. Explore collections of materials with similar and/or different properties. Talks about what they see, using a wide vocabulary. Explores how things work. Knows how to plant seeds and care for growing plants. Understands the key features of the life cycle of a plant and an animal. Begins to understand the need to respect and care for the natural environment and all living things. Explores and talks about different forces they can feel. E.g. how the water pushes up when they try to push a plastic boat underneath. Talks about the differences between materials and changes they notice. E.g. floating and sinking, light and dark. 	<ul style="list-style-type: none"> Explores the natural world around them. Discuss and understand how we care for the natural world around us. Sings songs and joins in with rhymes and poems about the natural world. After close observation, draws pictures of the natural world, including animals and plants. Describes what they see, hear and feel whilst outside. Recognises familiar plants and animals whilst outside. Recognises some environments that are different to the one in which they live. Understands and can talk about the effect of changing seasons on the natural world around them. 	<ul style="list-style-type: none"> Explores the natural world around them, making observations and drawing pictures of animals and plants. Knows some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class. Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter.

Personal, Social, Emotional Development and Communication and Language

	<ul style="list-style-type: none"> Children try a range of foods at mealtimes. Begins to show good eating habits and behaviours. Able to go to the toilet independently. Understand 'why' questions, like: "Why do you think the caterpillar got so fat?" Is increasingly independent in meeting their own care needs, e.g. brushing teeth, using the toilet, washing and drying their hands thoroughly Understand 'why' questions, like: "Why do you think the caterpillar got so fat?" 	<ul style="list-style-type: none"> Manages their own needs such as washing their hands, going to the toilet independently. Knows and talks about the different factors that support their overall health and wellbeing: regular physical activity, healthy eating, toothbrushing, sensible amounts of 'screen time', having a good sleep routine, being a safe pedestrian. learn new vocabulary. Ask questions to find out more and to check what has been said to them. Articulate their ideas and thoughts in well-formed sentences. Describe events in some detail. Use talk to help work out problems and organise thinking and activities, and to explain how things work and why they might happen. Use new vocabulary in different contexts 	<ul style="list-style-type: none"> Manages their own basic hygiene and personal needs, including dressing, going to the toilet and understanding the importance of healthy food choices. Make comments about what they have heard and ask questions to clarify their understanding

Science: Key Stage 1 Year 2

Biology

Chemistry

All living things and their habitats

Animals, including Humans

Plants

Everyday Materials

- Alive or dead
- Habitats
- Adaptations
- Food chains

- Animal reproduction
- Healthy living
- Basic needs

- Plant and seed growth
- Plant reproduction
- Keeping plants healthy

- *Identify different materials*
- *Name everyday materials*
- *Properties of materials*
- Compare the use of different materials

- Classify things by living, dead or never lived
- Know how a specific habitat provides for the basic needs of things living there (plants and animals)
- Match living things to their habitat
- Name some different sources of food for animals

- Know the basic stages in a life cycle for animals, (including humans)
- Know why exercise, a balanced diet and good hygiene are important for humans
- Classify foods in a range of ways.

- Research, observe and explain how seeds and bulbs grow into plants.

- classify materials.
- Identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses.
- Know how materials can be changed by squashing, bending, twisting and stretching
 - know why a material might or might not be used for a specific job

Scientific Skills	<ul style="list-style-type: none"> Explain in simple terms why an animal or plant is suited to a habitat e.g. the caterpillar cannot live under the soil like a worm as it needs fresh leaves to eat. 	<ul style="list-style-type: none"> Ask questions relating to human stages. Observe growth of an animal over time. Explore the effects of exercise on their body. Carry out simple tests to find out the importance of hand washing and hygiene. 	<ul style="list-style-type: none"> Make close observations of and classify seeds and bulbs. Carry out simple tests to compare growth and use findings to explain what plants need in order to grow and stay healthy (water, light & suitable temperature) Investigate what happens to plants when they are put in different conditions e.g. in darkness, in the cold, deprived of air, different types of soil, different fertilisers, varying amount of space. 	<ul style="list-style-type: none"> Test the properties of materials for particular uses
Possible learning challenges	<p>Questions- Why would a dinosaur not make a good pet?</p>	<p>Questions- How will 5 a day help me to be healthy? How could you be the next Mo Farah or?</p>	<p>Questions- How can we grow our own salad? How can you be the next master chef?</p>	<p>Questions- What is our school made of? Which materials did they use to build the Riverside Stadium?</p>
Vocabulary	<p>living, dead, never been alive, suited, suitable, basic needs, food, food chain, shelter, move, feed Names of local habitats- woodland, seashore, pond, marshland Names of micro-habitats e.g. under logs, in bushes etc.</p>	<p>offspring, reproduction, growth, child, young/old stages (examples chick/hen, baby/child/adult, caterpillar/butterfly) exercise, breathing, heartbeat, hygiene, germs, disease, food types (examples of- meat, fish, vegetables, bread, rice, pasta)</p>	<p>As for Year 1 plus: light, shade, sun, warm, cool, water, grow, healthy</p>	<p>Names of materials – wood, metal, plastic, glass, brick, rock, paper, cardboard Properties of materials – as for Year 1 plus opaque, transparent and translucent, reflective, non-reflective, flexible, rigid Shape, push/pushing, pull/pulling, twist/twisting, squash/squashing, bend/bending, stretch/stretching</p>

Science: Year 3

<ul style="list-style-type: none"> Know the life cycle of different living things e.g. mammal, amphibian, insect and bird Know the differences between different life cycles 	-Know about changes as humans develop from birth to old age.	<ul style="list-style-type: none"> Compare and group materials based on their properties (e.g. hardness, solubility, transparency, conductivity, [electrical & thermal], and response to magnets 	<ul style="list-style-type: none"> Know what gravity is and its impact on our lives Identify and know the effect of air and water resistance 	<ul style="list-style-type: none"> Know about and explain the movement of the Earth and other planets relative to the Sun

<ul style="list-style-type: none">• Know the process of reproduction in plants• Know the process of reproduction in animals		<ul style="list-style-type: none">• Know and explain how a material dissolves to form a solution• Know and show how to recover a substance from a solution• Know and demonstrate how some materials can be separated (e.g. through filtering, sieving and evaporating)• Know and demonstrate that some changes are reversible and some are not• Know how some changes result in the formation of a new material and that this is usually irreversible	<ul style="list-style-type: none">• Identify and know the effect of friction	<ul style="list-style-type: none">• Know about and explain the movement of the Moon relative to the Earth• Know and demonstrate how night and day are created• Describe the Sun, Earth and Moon (using the term spherical)
--	--	---	--	--

Scientific Skills

- Use secondary sources and, where possible, first-hand observations to find out about the life cycle of a range of animals.
- Compare the gestation times for mammals and look for patterns e.g. in relation to size of animal or length of dependency after birth.
- Look for patterns between the size of an animal and its expected life span.
- Grow and observe plants that reproduce asexually e.g. strawberries, spider plants, potatoes.
- Take cuttings from a range of plants e.g. African violet, mint.
- Plant bulbs and then harvest to see how they multiply.
- Use secondary sources to find out about pollination.

- Create a timeline to indicate stages of growth in humans

- Investigate the properties of different materials in order to recommend materials for particular functions depending on these properties e.g. test waterproofness and thermal insulation to identify a suitable fabric for a coat.
- Explore adding a range of solids to water and other liquids e.g. cooking oil, as appropriate.
- Investigate rates of dissolving by carrying out comparative and fair test.
- Separate mixtures by sieving, filtering and evaporation, choosing the most suitable method and equipment for each mixture.
- Explore a range of non-reversible changes e.g. rusting, adding fizzy tablets to water, burning.
- Carry out comparative and fair tests involving non-reversible changes e.g. What affects the rate of rusting? What affects the amount of gas produced?

- Investigate the effect of friction in a range of contexts e.g. trainers, bathmats, mats for a helter-skelter.
- Investigate the effects of water resistance in a range of contexts e.g. dropping shapes through water and pulling shapes, such as boats, along the surface of water.
- investigate the effects of air resistance in a range of contexts e.g. parachutes, spinners, sails on boats.
- Explore how levers, pulleys and gears work.
- Research how the work of scientists such as Galileo Galilei and Isaac Newton helped to develop the theory of gravitation.
- Research George Stephenson and his development of the first steam engine.

- Use secondary sources to help create a model e.g. role play or using balls to show the movement of the Earth around the Sun and the Moon around the Earth.
- Use secondary sources to help make a model to show why day and night occur.
- Make first-hand observations of how shadows caused by the Sun change through the day.
- Make a sundial.
- Consider the views of scientists in the past and evidence used to deduce shapes and movements of the Earth, Moon and planets before space travel.

Possible learning challenges	<p>Questions:</p> <ul style="list-style-type: none"> -Do all animals start their life as an egg? -Can you work out which animals depend on each other for survival? -What is the life expectancy of different animals and why? 	<p>Questions:</p> <ul style="list-style-type: none"> -What can you do now that you couldn't as a baby? -What do you understand about the term 'puberty'? 	<p>Questions:</p> <ul style="list-style-type: none"> -How could you solve a crime by using forensic evidence? -Can you think of five materials that can be changed and reversed, and five that cannot? -Can you give any examples of how chemical changes can impact our lives? 	<p>Questions:</p> <ul style="list-style-type: none"> -Why will a car always move faster than a boat? -Can you describe and explain how motion is affected by forces? -Can you work out how water can cause resistance to floating objects? 	<p>Questions:</p> <ul style="list-style-type: none"> -Can we describe the Sun and Earth as Space cousins? -Can you compare the different time of day at different places on the Earth?
Vocabulary	<p>life cycle, reproduce, sexual, sperm, fertilises, egg, live young, metamorphosis, asexual, plantlets, runners, bulbs, cuttings</p>	<p>Puberty – the vocabulary to describe sexual characteristics</p>	<p>thermal/electrical insulator/conductor, change of state, mixture, dissolve, solution, soluble, insoluble, filter, sieve, reversible/non-reversible change, burning, rusting, new material</p>	<p>force, gravity, Earth, air resistance, water resistance, friction, mechanisms, simple machines, levers, pulleys, gears</p>	<p>Earth, Sun, Moon, (Mercury, Jupiter, Saturn, Venus, Mars, Uranus, Neptune), spherical, solar system, rotates, star, orbit, planets</p>

Science: Year 6

Biology			Physics	
Animals, including humans	All living things and their habitats	Evolution and Inheritance	Electricity	Light
<ul style="list-style-type: none"> <i>The circulatory system</i> <i>Water transportation</i> <i>Impact of exercise on body.</i> 	<ul style="list-style-type: none"> <i>Classification of living things and the reasons for it</i> 	<ul style="list-style-type: none"> <i>Identical and non identical off-spring</i> <i>Fossil evidence and evolution.</i> <i>Adaptation and evolution.</i> 	<ul style="list-style-type: none"> <i>Electrical components</i> <i>Simple circuits</i> <i>Fuses and voltage</i> 	<ul style="list-style-type: none"> <i>How light travels</i> <i>Reflection</i> <i>Ray models of light</i>
<ul style="list-style-type: none"> Identify and name the main parts of the human circulatory system Know the function of the heart, blood vessels and blood Know the impact of diet, exercise, drugs and lifestyle on health Know the ways in which nutrients and water are transported in animals, including humans 	<ul style="list-style-type: none"> Classify living things into broad groups according to observable characteristics and based on similarities and differences Know how living things have been classified Give reasons for classifying plants and animals in a specific way 	<ul style="list-style-type: none"> Know how the Earth and living things have changed over time Know how fossils can be used to find out about the past Know about reproduction and offspring (recognising that offspring normally vary and are not identical to their parents) Know how animals and plants are adapted to suit their environment Link adaptation over time to evolution Know about evolution and can explain what it is. 	<ul style="list-style-type: none"> Compare and give reasons for why components work and do not work in a circuit Draw circuit diagrams using correct symbols Know how the number and voltage of cells in a circuit links to the brightness of a lamp or the volume of a buzzer 	<ul style="list-style-type: none"> Know how light travels Know and demonstrate how we see objects Know why shadows have the same shape as the object that casts them Know how simple optical instruments work e.g. periscope, telescope, binoculars, mirror, magnifying glass etc.

Scientific Skills

- Create a role play model for the circulatory system.
- Carry out a range of pulse rate investigations:
 - pattern seeking – exploring which groups of people may have higher or lower resting pulse rates
 - observation over time - how long does it take my pulse rate to return to my resting pulse rate (recovery rate)
 - pattern seeking – exploring recovery rate for different groups of people.
- Research the negative effects of drugs (e.g. tobacco) and the benefits of a healthy diet and regular exercise by asking an expert or using carefully selected secondary sources.

- Use secondary sources and, where possible, first-hand observations to find out about the life cycle of a range of animals.
- Compare the gestation times for mammals and look for patterns e.g. in relation to size of animal or length of dependency after birth.
- Look for patterns between the size of an animal and its expected life span.
- Grow and observe plants that reproduce asexually e.g. strawberries, spider plants, potatoes.
- Plant bulbs and then harvest to see how they multiply.
- Use secondary sources to find out about pollination.

- Design a new plant or animal to live in a particular habitat.
- Use models to demonstrate evolution e.g. 'Darwin's finches' bird beak activity.
- Use secondary sources to find out about how the population of peppered moths changed during the industrial revolution.
- Make observations of fossils to identify living things that lived on Earth millions of years ago.
- Identify features in animals and plants that are passed on to offspring and explore this process by considering the artificial breeding of animals or plants e.g. dogs.
- Compare the ideas of Charles Darwin and Alfred Wallace on evolution.
- Research contributions made by local scientists Albany and John Hancock and Joseph Alder.
- Research the work of Mary Anning and how this provided evidence of evolution.

- Explain how a circuit operates to achieve particular operations, such as to control the light from a torch with different brightnesses or make a motor go faster or slower.
- Make circuits to solve particular problems, such as a quiet and a loud burglar alarm.
- Carry out fair tests exploring changes in circuits.

- Explore different ways to demonstrate that light travels in straight lines e.g. shining a torch down a bent and straight hose pipe, shining a torch through different shaped holes in card.
- Explore the uses of the behaviour of light, reflection and shadows, such as in periscope design, rear view mirrors and shadow puppets.

Possible Learning Challenges	<p>Questions:</p> <ul style="list-style-type: none"> -Why can the heart be described as the most important pump we have? -What is a pulse and why do we have one? -Why could we describe blood as the body's river system? -Can you compare the organ system of humans with another animal? 	<p>Questions:</p> <ul style="list-style-type: none"> -Can you discover the special attributes that some animals and plants have to help them survive? -What are micro-organisms and how would you classify them? -Why might some animals and plants be endangered? 	<p>Questions:</p> <ul style="list-style-type: none"> -Why do you not look exactly like your mum or dad? -What is DNA? Can you explain what it is? -What are advantages and disadvantages of specific adaptations? 	<p>Questions:</p> <ul style="list-style-type: none"> -Can you explain the danger of short circuits? -How do traffic lights work? 	<p>Questions:</p> <ul style="list-style-type: none"> -Can you explain how different colours of light can be created? -How do your eyes work? -How do we know that light travels faster than sound? -How can you use mirrors to see around corners?
Vocabulary	<p>heart, pulse, rate, pumps, blood, blood vessels, transported, lungs, oxygen, carbon dioxide, nutrients, water, muscles, cycle, circulatory system, diet, exercise, drugs, lifestyle</p>	<p>life cycle, reproduce, sexual, sperm, fertilises, egg, live young, metamorphosis, sexual, plantlets, runners, bulbs, cuttings</p>	<p>offspring, sexual reproduction, vary, characteristics, suited, adapted, environment, inherited, species, fossils</p>	<p>Circuit, complete circuit, circuit diagram, circuit symbol, cell, battery, bulb, buzzer, motor, switch, voltage</p>	<p>As for Year 3 - Light, plus straight lines, light rays</p>
